CheckIT

Pre-Packed Weight Control

CheckIT is the software that allows a centralized control of all data for statistical control.

Funzionalità Principali

- Software accessible by **Browser** from any device.
- It allows the control of the weight of fixed weight products (eg food products) in line with EU regulation **EEC 70/2011** which guarantees the consumer that each product complies in terms of weight and volume as declared by the manufacturer.
- CheckIT, connected to one or more scales that perform sample checks of the weight of the products, allows the Quality Manager to have a **real-time monitoring** of the work.
- Possibility to manage directly from the software all the scales used for statistical control (the scales can be programmed from the software without stopping the production line).
- The software can be **integrated** with the company management system
- Centralized management of data from **Remote**
- Possibility of managing the **predetermined tare**
