WeightIT-EASY

Manage your Weighbridge from Tablet

WeightIT EASY is the software which simplifies the management of the input/output weighs on the weigh bridge through the use of a touch screen display.

Main Functions

- Manages the input/output weighs through a 7" or 15" **display** connected directly to the instrument that digitizes the load cells of the weighing machine.
- Usable **WITHOUT an Ethernet/Intranet connection**.
- During the input/output weighing operations of the vehicles, the OPEN weighs are kept in memory waiting for the closing weight.
- The weighs are identified by the plate of the vehicle, if inserted, or by a unique ID number generated by the WeighIT EASY system.
- WeightIT EASY manages **4 archives**: SUPPLIERS, CUSTOMERS, PLATES, MATERIALS that can be populated directly by the operator. These archives, if selected for the current weighing, will be printed on the outgoing receipt, through the printer connected to the touch screen display.
- WeightIT EASY manages only one scale, but it can be combined with a second WeightIT EASY to manage two scales with input and output function.
- A **RFID CARD reader** can be connected and the card can be associated to an entry in each archive (CUSTOMER CARD n...., PLATE CARD or SUPPLIER CARD ...). When the CARD is passed before weighing, the associated field is associated in the printout.

Options that can be Added

- Addition of an archive HISTORICAL WEIGHTS;
- Possibility of filtering the weighs in the Historic Database by Customer, Supplier, Quantity, Goods.
- Possibility of exporting the filtered weighs archive in CSV format via USB.
